

Priming for first use

Prior to first usage or after a period of inactivity, the hydraulic circuit of the LB4100 may require priming. Please follow this simple procedure:

1. Ensure the machine is on and ready for use with one green led lit on the dial.
2. Open taps A and B underneath the machine.

3. Fit both handles WITHOUT coffee pods inside.
4. Press buttons 1 and 2. After 2-3 seconds of the pump running, close taps A and B
5. Water will now dispense from the handles then stop.
6. The machine is now ready for use
