

# LB 2300 Descaling Procedure

Throughout the descaling procedure, please refer to this diagram for button identification

**PLEASE READ INSTRUCTIONS IN FULL BEFORE STARTING**

**THIS PROCESS MUST BE COMPLETED IN FULL AND NOT INTERRUPTED**

1. Ensure the machine is switched on and the display shows ready.
2. Place exactly 1.5 litres of warm water in tank, **DO NOT FILL**.
3. Add to the water 1 sachet of EXPRESSOKLEAN powder. Stir carefully until dissolved.
4. Tap the menu button, to access the menu.
5. Tap the up button until the display reads 'Descaling'.
6. Tap the enter button. The display will read 'Do it now'.
7. Tap the enter button. At the bottom of the screen the word 'No' appears.
8. Tap the up button, 'No' will change to 'Yes'.
9. Tap the enter button and follow the instructions on the display. Remove and empty coffee grounds drawer, reinsert when the display changes to 'Insert'.
10. As instructed on screen, remove the cup grill and point the steam wand into the dreg drawer.
11. Tap the enter button. The display will show 'Insert descale'.
12. Tap the enter key once again to begin.
13. This stage will take approx 30mins. Do **NOT** add any extra water.
14. The next message to appear will read 'Descale in progress – fill water tank'.
15. Completely fill the water tank with plain cold tap water.
16. Display will now show 'Rinsing - enter to start'.
17. Tap the Enter button.
18. Empty the dreg drawer and replace when directed. The machine will now rinse.
19. Wait approx 10 minutes for 'Descale executed' message.
20. Tap Enter, the machine will reboot.
21. Empty the dreg drawer and replace in the machine.
22. Your machine is ready for use - **Enjoy a cup of coffee!**

## SAFETY & CLEANING INSTRUCTIONS

- Please ensure there is always water in the machine prior to switching it on.
- Always place the jug under the steamer, with the steamer wand submerged in the milk otherwise the steam can burn you.
- It is recommended that you clean the steam wand immediately after using the steamer with a clean moist tea towel.
- Any unused milk left in the jug can be reused for the next coffees as long as the jug has been placed in the fridge after being used. Top up with cold milk.
- Milk left to stand in a jug for long periods of time should not be used.
- If milk build up on the steam wand the outer extremity wand can be removed by twisting it gently and pulling it down. Wash in warm water and re-insert on the wand
- Always ensure you clean the milk jug and thermometer.
- Always purge the steam arm at the end of the day to clean out any build up of milk inside the arm.
- To do this let the steam discharge into a empty jug for 30 seconds.
- Do not clean any parts of the coffee machine in a dishwasher as they will be damaged.
